A Meaningful Award in Our 30th Year:

Logistics Company of the Year

We are proud and delighted to have been honored with the “Logistics Company of the Year” award at the 9th Logistics Achievement Awards, held as part of the 10th Economy and Logistics Summit organized by UTA Logistics Magazine this year.

This meaningful award not only reflects the success of our industry today, but also represents the determination, innovation, and customer-focused service approach we have demonstrated throughout our 30-year journey. Since our founding, we have worked tirelessly to raise quality standards in the logistics industry, enhance operational efficiency, and provide our customers with end-to-end integrated solutions.

Receiving this award in recognition of our sustainable impact on the Turkish logistics sector, our steady growth through strategic investments both at home and abroad, and our contribution to promoting Türkiye’s logistics strength on national and international platforms is a distinct honor for us.

We extend our heartfelt thanks to all our dedicated team members, business partners, and stakeholders who made this achievement possible. With the same passion and commitment, we will continue to take strong and innovative steps that add value to our industry in the years ahead.

Global Unity, Shared Goals: SALES SUMMIT 2025

In our 30th year, the first-ever Sales Summit 2025 became a significant gathering that not only brought together our Sales team but also contributed to the shared vision of the entire Kita family across Türkiye and our global offices.

Held as a dinner event at the Ramada Hotel Tekstilkent, the summit brought together our Sales team members from Türkiye and our international offices, both in person and online. Throughout the program, we reviewed our new-term objectives, growth strategies, and global vision together.

The presentations delivered by our executives, the exchange of ideas among participants, and the valuable insights shared during the event established a strong foundation — one that will not only enhance our sales processes but also strengthen the future synergy of our entire organization.

At Kita Logistics, we recognize that every sales achievement is made possible through the seamless collaboration of all our departments — operations, warehousing, finance, human resources, brand, and beyond. For this reason, Sales **Summit 2025** served as a true workshop that united us around our shared goals and collective drive for excellence.

We Expanded Our Global Network At Transport Logistic 2025

Transport Logistic 2025 Munich served as an inspiring platform for the entire industry. At this major event, we established new business connections, explored the latest innovations in the logistics sector, and gained valuable insights into the transportation solutions of the future.

As Kita Logistics, we sincerely thank everyone for the great interest shown in our stand. Events like this contribute to the advancement of the logistics industry and open the door to new collaborations. We remain fully committed to our goal of exceeding the expectations of both our industry and our stakeholders.

Kita Logistics Takes the Stage at Logistech 2025 with Innovation!

At Kita Logistics, we are proud to participate in Logistech 2025, one of the most prestigious events in the logistics industry.

This important exhibition brings together innovations, best practices, and industry-leading professionals in global logistics and supply chain management.

At Kita Logistics, we are taking part in this valuable platform with a special concept for this year, aiming to closely follow industry developments, showcase our innovative so-

lutions, and lay the groundwork for new collaborations.

In addition to our services in air, land, sea, and project transportation, we will share the latest updates on new destinations we now serve, our recent investments, offices, and brand/digital transformation initiatives. We warmly invite all industry representatives planning to attend Logistech 2025 to visit our stand at Hall A, Stand 225, and we look forward to their contribution as we continue our journey to shape the future of the logistics sector together.

New Office, New Goals in Our 30th Year: KITA Georgia Now in Service

We have added a new milestone to our growth journey.

With our new office in Georgia, we are further expanding our service network by providing direct access to the Caucasus and Central Asian markets.

Strengthening our logistics network, our Tbilisi office enables us to conduct logistics operations to Azerbaijan, Kazakhstan, Uzbekistan, Turkmenistan, and surrounding countries with greater agility and efficiency. We offer our regional partners and agents end-to-end solutions for import and export through road, sea, and air transportation, covering everything from customs processes to door-to-door delivery.

Our Services in Georgia:

- Customs clearance and terminal services at Poti and Batumi ports
- Transit transportation to or from Central Asia via Georgia
- Road transportation (FTL/LTL) to Georgia, Azerbaijan, and Armenia
- Air transportation (import and export)
- Sea transportation (FCL/LCL) (import and export)

We are at the Heart of the French Business Community

Essec Business School & CCI France Turkey Event Successfully Concluded

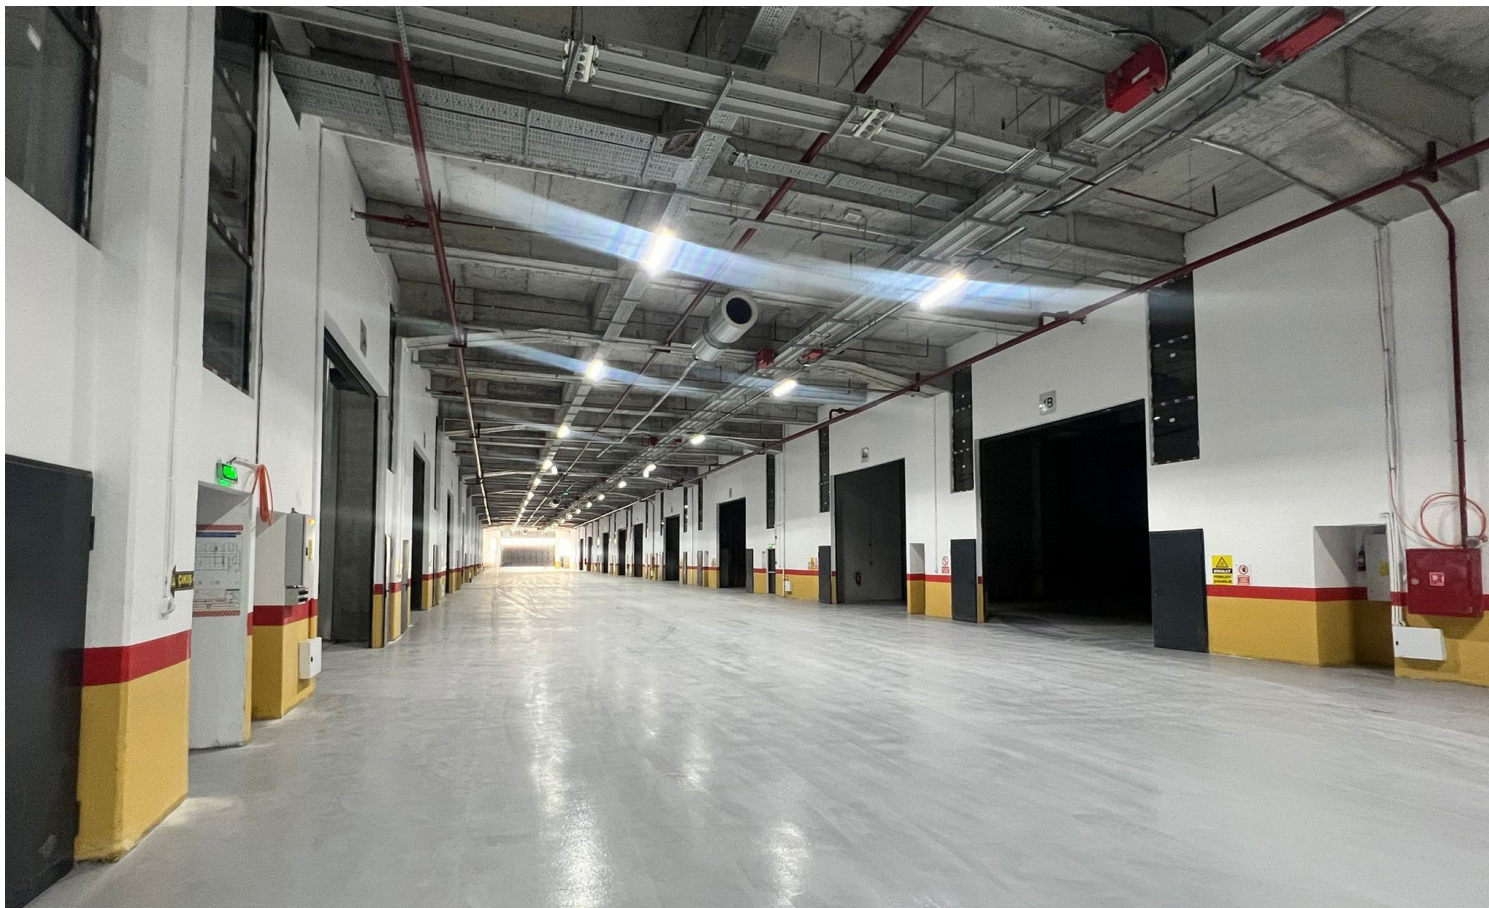

As the sole representative from our industry, we participated in the biannual business meeting in Istanbul organized in collaboration with the Turkish-French Chamber of Commerce (CCI France Turquie) and Essec Business School.

The three-day program brought together senior French representatives from various sectors, including automotive, logistics, fast-moving consumer goods, and services. Participants were provided with comprehensive insights into Turkey's sectoral advantages, investment opportunities, and collaboration potential.

During the event, our Vice Chairman Emre Eldener delivered a presentation sharing valuable information on Turkey's logistics infrastructure, regional transportation capabilities, and digitalization trends in the sector.

Throughout the event, Kita Logistics stood out not only for engaging with the business community but also for showcasing our industry vision and commitment to sustainable growth.

We Have Started Cargo Acceptance at **Our New Ambarlı Warehouse**

At Kita Logistics, we are proud to mark another significant milestone in our growth journey. By relocating to our new Ambarlı Warehouse facility, we have doubled our bonded warehouse space to 17,000 m². In addition, our total storage capacity—including bonded, non-bonded, and free warehouses—has now reached 48,000 m².

With its modern infrastructure and expanded capacity, our new warehouse provides faster, more flexible, and secure solutions for both regional and international logistics operations. Built in full compliance with the latest standards in occupational health, fire safety, and electrical safety, the facility is ready to serve new and diverse brands across multiple industries, and we are excited to begin this next chapter.

Key Advantages of Kita Bonded Warehouse

Alternative Use of Bonded Warehousing

The close proximity of our Ambarlı and Muratbey facilities enables us to offer the fastest alternative solution in cases of congestion or operational intensity.

Experienced Operations Team

Our long-standing team of specialists manages your operations with full transparency, agility, and precision.

Robust Operational Equipment

With 23 forklifts, an 80-ton truck scale, and a wide range of attachments and heavy-duty equipment, we provide safe and efficient service for all industries including oversized and high-volume cargo.

Strategic Location Advantage

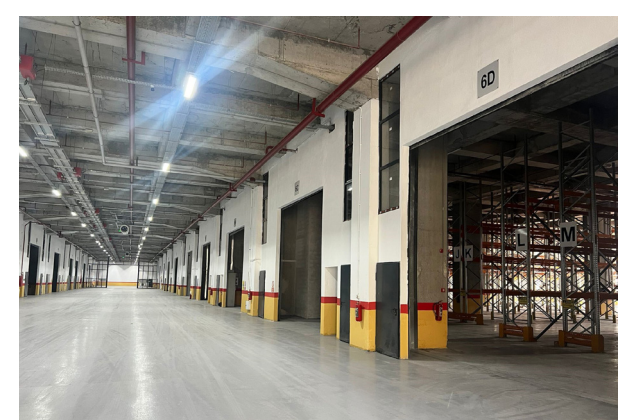

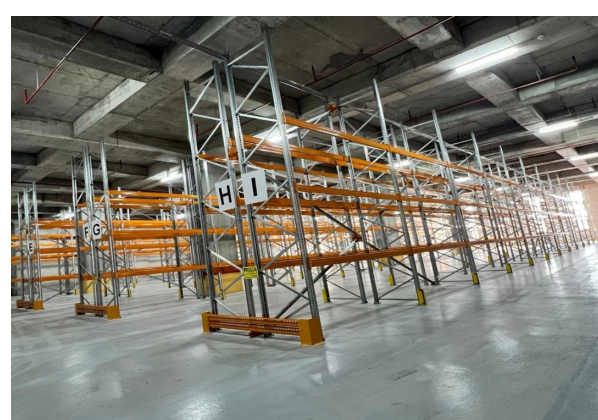

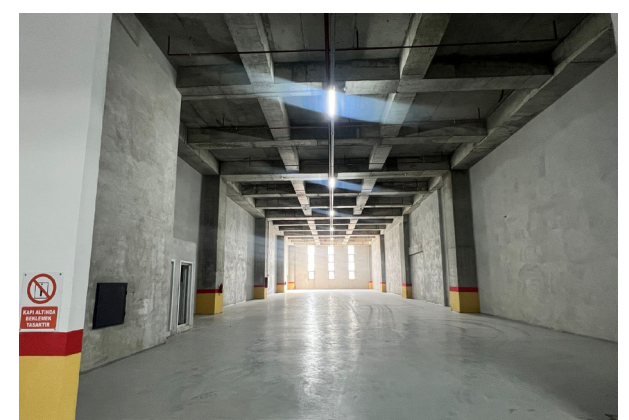

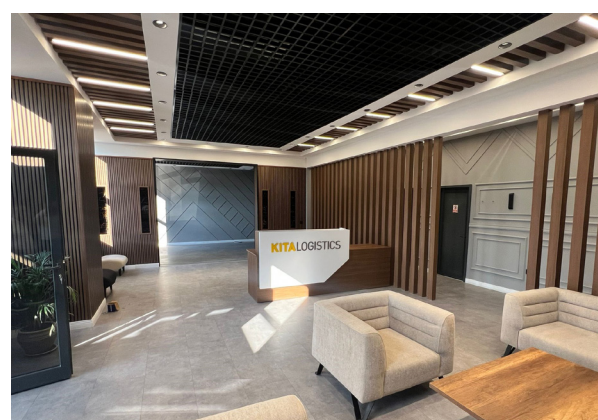

With bonded warehouses connected to both Ambarlı and Muratbey customs and close proximity to ports and airports — we offer significant time and cost advantages.

Tailor-Made Services

We offer operational flexibility including extended working hours, fast documentation flow, re-packing, re-labeling and product arrangement services tailored to your needs.

Industry-Specific Solutions

From dedicated hanging and shelved textile areas to secure vault rooms for valuable goods, cold storage, and 24/7 surveillance — we deliver sector-tailored solutions for every requirement.

KITA Sales Workshop Events Have Begun

As Kita Logistics, we place great importance on enhancing the logistics knowledge of all our colleagues across different departments. With this vision in mind, we launched the first session of our KITA Sales WORKSHOPS series on September 5th at our new Ambarlı Bonded Warehouse facility.

The event began with an opening speech by our Vice Chairman of the Board, Mr. Emre Eldener, followed by presentations from many of our senior leaders, including our Warehouse General Manager and Sales Operations Managers. Participants gained a 360-degree perspective on logistics through comprehensive presentations covering Insurance, Air, Road, and Sea operations.

One of the program's key highlights was the facility tour, where participants had the opportunity to explore our new warehouse up close. Here, Kita's strong infrastructure and modern warehouse management systems were demonstrated in a hands-on format.

With this valuable series now underway, our goal is to further develop the field expertise of all Kita team members and strengthen knowledge sharing across the organization. We extend our gratitude to all colleagues who participated and to our managers who contributed with their insightful presentations.

Successful Air Cargo Operation to Doha

We once again brought our vision of delivering tailor-made solutions to our business partners to life with a strong operational performance. We collected 21 oversize pallets (a total of 17 tons of low-voltage panels) from a production facility in İzmir using our own fleet and successfully delivered them to Doha in collaboration with Turkish Cargo, following our planned processes.

Throughout the operation, we designed a transport plan tailored to the special dimensions and weight of the cargo. Thanks to the flexibility and security provided by our own vehicle fleet, we created added value from the very first step. We then carefully integrated the products into the air freight process and ensured a smooth and timely delivery to the final destination.

With our expertise in air cargo and our strong global partnerships, every shipment we move to different parts of the world reflects our commitment to going beyond success.

Successful Shipment from İzmit to Jeddah and Karachi

For our global Turkish business partner, we successfully completed two separate sea freight shipments departing from İzmit. The cargo destined for the ports of Jeddah and Karachi was meticulously managed in line with our planned operational processes.

Each shipment involved 40'HQ containers, and among the cargo were adhesive products classified as chemical materials. These loads were securely prepared for transport through the lashing (cargo securing) services provided by our expert team, ensuring that the products reached their destinations without damage throughout the journey.

At Kita Logistics, our goal in every operation is not only to move cargo but also to deliver the highest level of trust, speed, and operational excellence to our business partners. This shipment once again demonstrated our company's competitive strength and solution-oriented capabilities in the international arena.

Kita Logistics Hosts International Business Partners in İstanbul for Its 30th Anniversary

As we celebrate our 30th anniversary, we continue to strengthen our international partnerships. In this context, we were delighted to welcome our valued business partners from the United Kingdom in İstanbul.

During the meeting, we reviewed our recent investments and future strategies in detail. Through mutual exchange of ideas, we not only reinforced our existing collaborations but also opened

the door to new opportunities aligned with our shared goals.

At Kita Logistics, while expanding globally, we remain committed to nurturing the trust-based relationships we have built with our partners. Guided by the principle, "We do our work with love, share that love, and celebrate success together," we aim to further elevate our joint achievements in the international arena in the period ahead.

A Valued Visit at Kita Logistics

We were pleased to welcome Mr. Şeref Tunç, APG Turkey Etihad Sales Manager, at our Headquarters.

We believe that this productive meeting will further strengthen our existing cooperation and contribute to our future joint projects. In line with our commitment to mutual trust and sustainable partnerships in the business world, this visit holds a special value for us.

As the Kita Logistics family, we would like to thank Mr. Şeref Tunç for his kind visit and wish for our shared successes to continue growing.

A Participation That Inspires the Youth

Our Anatolia Regional Director, İbrahim Toktaş, participated in the “Freight Forwarding Enterprises” session held as part of the event organized by Dokuz Eylül University Maritime Faculty.

As part of this initiative, our Anatolia Regional Director, İbrahim Toktaş, took part in the “Freight Forwarding Enterprises” session held on May 23. During the session, Mr. Toktaş shared the latest developments in the logistics sector and enriched the discussion with real-life examples from his field experience, offering students valuable insights and a broader perspective.

Participants had the opportunity to better understand the dynamics of the industry and gained valuable knowledge that will inspire their professional development. Supporting young people in exploring the world of logistics, clarifying their career goals, and taking confident steps toward the future is highly meaningful for us.

At Kita Logistics, we remain committed to taking part in such organizations, contributing to the development of new talent in the sector, and fostering continuous knowledge sharing.

A DAY AT KITA

From now on, in each issue, we'll be spotlighting one Kita team member's day for you!

A Day in the Operations Team: Heroes of Export

“When I arrive at the office in the morning, the first thing I do is check my emails. I prioritize the ones waiting for a response and reply to them quickly. If there is a loading scheduled for that morning, I share the vehicle details with the agent and the shipper.

In sea export operations, checking whether everything is progressing according to plan is absolutely critical. Are the documents complete? Has the customer responded? Is there any change in the vessel schedule? Have the cut-off dates been met? The day must start by reviewing these initial steps of the operation.

All required tasks for the shipments under my responsibility—such as instructions, VGM, declarations, and bookin-

gs—are carefully planned and executed throughout the day. After completing urgent tasks, I check vessels still at port and begin the invoicing process.

Final bills of lading are prepared according to the requests of the shipper and the agent. Departed vessels are reported to customers, followed by the sharing of pre-alert documents.

At the end of the day, if there are loadings scheduled for the next day, I begin organizing and preparing their operational plans. Every day has a different flow, but we always work with the same sense of responsibility.”

Emre Doğan

Sea Freight Export Operations Supervisor
